NAXUS 6.0 INDICATOR INSTRUCTION MANUAL

How to use the (NEXUS 6.0 INDICATOR)

1 Minute Timeframe & 1 Minute Expiry

On the picture below, you will see how the strategy is supposed to look like, after it has been installed. Have a look at it, and I will explain everything further below

As you can see, the fundamental element of the strategy is the arrow. This type of arrow appears if all the analytical conditions are met. Here you can see only two

NAXUS 6.0 INDICATOR INSTRUCTION MANUAL

highlighted candles, One where you can see the arrow appear and 2nd after the arrow where you need to execute your trade. That's the simple thing you need to see the arrow and place a trade on next candle.

5 Minute Timeframe & 5 Minute Expiry

Let's come to another scenario.

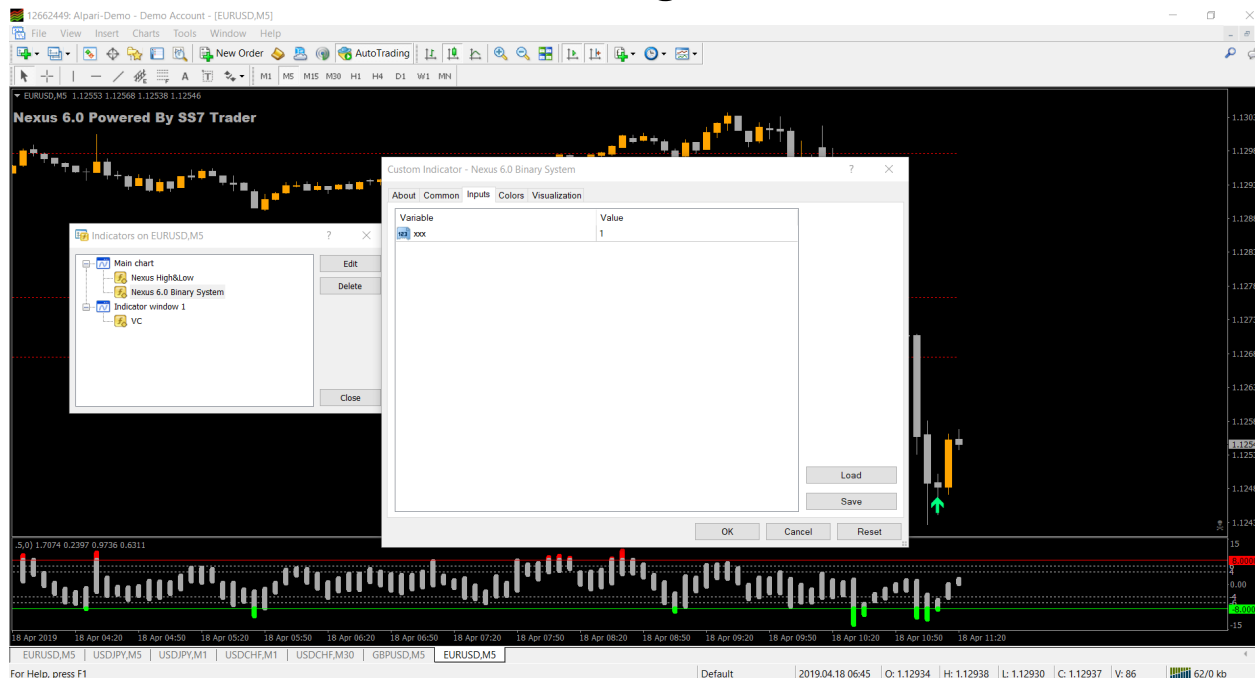

Here you can see again 2 highlighted candles 1st one where the arrow appears and second where you need to execute the trade on 5 minute expiry. Remember that we use 5 min timeframe that's why we trade on 5 minute expiry.

Same thing goes on all timeframes
means if your timeframe is 15 mins then
expiry also is 15 mins

NAXUS 6.0 INDICATOR INSTRUCTION MANUAL

How to increase indicator accuracy

if you want to increase the indicator accuracy then right click on the graph and click on indicators then double click on “ Nexus 6.0 Binary system “ indicator and goto inputs and change the value and replace 1 to 2 like this image

NAXUS 6.0 INDICATOR INSTRUCTION MANUAL

after this settings you will see the accuracy is maximum but signals is minimum so you need to open at least 10 currency pairs then you get some signals on daily basis.

MOST IMPORTANT

Do not place the trades before or after 15 mins the news. Cause news can change the directions instantly and no indicator or Robot will work on news accurately.
